## FEATURES & BENEFITS

### Easy to assemble

Our chrome wire shelving require no tools for assembly. This makes them really simple and quick to build for easy storage or transportation.

### Easy-to-clean and hygienic

The smooth, chrome wire makes these units extremely easy to wipe down and keep clean, whilst also allowing for better air circulation. This makes them ideal for use in catering and medical locations.

### Fully adjustable for maximised storage

Each shelf can be quickly and easily adjusted every 25 mm allowing you to store or display a variety of differently-sized products without wasting space, and maximising storage.

### Stylish and flexible design

The versatile design is perfect for creating beautiful displays as well as being practical for storage. The contemporary style, with an attractive chrome finish, is neutral and will complement any shop, office, restaurant or kitchen.

### Steel construction with high load capacity

Our shelving units are built to last. With a solid, steel construction and a capacity of up to 200 kg, they can cope with a variety of heavy products, making them ideal for warehouses and storerooms.

### Coordinated range and accessories

We stock a large selection of accessories and additional shelving. The coordinated range and modular design allows you to tailor your exact requirements, for your business or home, and expand as your needs grow.
