FEATURES & BENEFITS

Wide range of sizes

We stock a large selection of rails in sizes between 2ft and 6ft, so you'll always find one to suit your needs and fit your space.

Steel construction with high load capacity

Our clothes rails are built to last. With a solid, steel construction and a capacity of up to 100kg, they can cope with large quantities of garments so you can display or store more stock.

A variety of options

With a range of 2-tier, double-rail, heavy-duty, foldable and adjustable rails, as well as a choice of colours and finishes, we can find a rail that meets your exact requirements.

Easy to assemble

Our clothes rails use a secure push-pin system, so no tools are required for assembly. This makes them really simple and quick to build and allows for easy storage or transportation.

Easily manoeuvred

All our rails come with detachable castor wheels for effortless movement. The rails glide smoothly across the floor and help with relocation or repositioning.

Varied range of accessories and components

We have a huge range of accessories and components including rail covers, heavy duty wheels and sign holders so you can modify and expand your clothes rails as your business grows.
