

Thank you for purchasing this product.

Please remember to check that you have all component parts before beginning assembly.

N.B. These instructions are for standard units, but the same principals apply to our heavy duty, wine & kitchen and mobile units. Larger units will have posts in two sections that will need screwing together at step 5.

## Step 1:

Screw the foot leveller (or castor wheels for mobile units) into the lower post in a clockwise direction. N.B. The upper-post has a black plastic end cap and the lower-post has a foot leveller attached.

## Step 2:

Snap the sleeves into the post grooves at an equal height. Sleeves must be snapped together with the arrow pointing upwards

## Step 3:

Make sure that you have the shelf the correct way up (the shelf edges should be facing down and the shelf should fit on top of the sleeves). Hold the shelf on its side and slide the top of the four posts through the bottom of the shelf at its corners until there is a snug fit.

## Step 4:

After four posts have been slid through the shelf corner holes, set the shelf upright. Snap the sleeves at your next desired shelf height. Slide the shelf down from the top of the posts onto the sleeves.

**Step 5:**

If your unit came in two sections, screw the upper-posts into the lower-posts. Repeat step 4 for all remaining shelves.

**Step 6:**

Push firmly down on every shelf at each of its corners with a rubber mallet to secure the shelf in place. (Using a rubber mallet can make installation easier – use caution not to damage the unit.)

**Step 7:**

Screw the foot levellers clockwise (to lower) or anticlockwise (to raise) at the bottom of the posts to attain proper levelling.

**Step 8:**

To add the clothes rail attachment, clip each bracket into the top shelf at equal distances from each end. Slide the chrome tube into place so that it overhangs each bracket equally.
