1. Assemble Base

Screw the base together into the 'H' shape using the 4 screws provided and then screw the adjustable feet in the corners. Do not over-tighten.

2. Fit End Panels

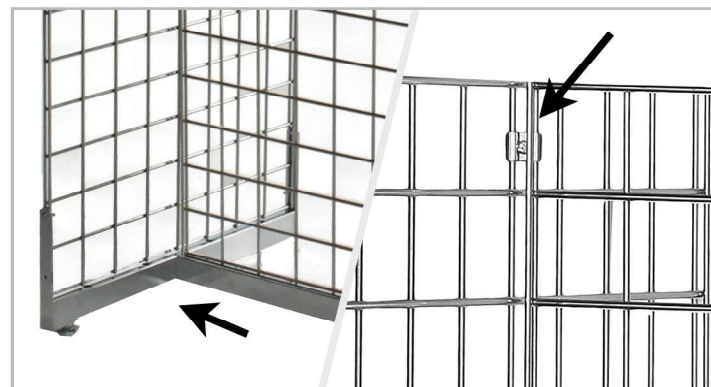

Position one of the mesh panels in to one end of the frame and fix with 4 of the nuts, bolts and washers supplied. Repeat with other end panel.

Components

Frame Centre	x 1
Frame Ends	x 2
Frame Feet	x 4
Frame Screws	x 4
Grid Mesh Panels	x 4
Nuts, Bolts & Washers	x 10
Joining Clips	x 6

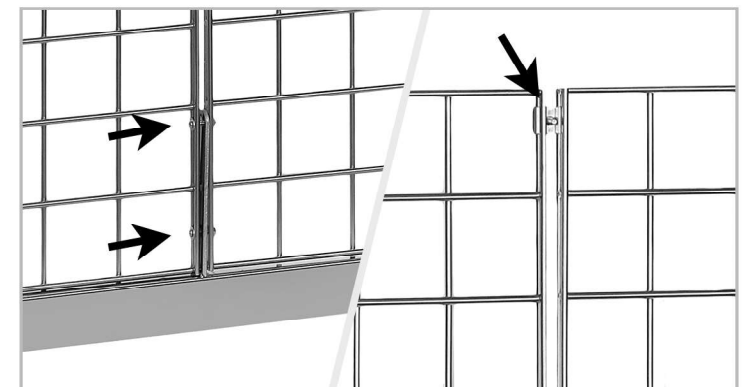

Safety

- + Best constructed by 2 persons
- + Construct within ample space and on a solid flat surface
- + Check all fixing points are secure before use in a public environment

3. Position Centre Panels

Position a panel perpendicular to an end frame and fix it at the top and bottom using the joining clips. Repeat with the other centre panel.

4. Secure Centre Panels

Once both centre panels are in place, fit together through the frame with two bolts, then at the top with a joining clip.
