

Retail Shelving Assembly Guide

Thank you for purchasing this product.

Please remember to check that you have all component parts before beginning assembly.

Assembly Guide for a 90 Degree Corner Bay

Locate the baseleg rear lug and block into the bottom “H Slots” of the upright as shown.

Using a rubber mallet, firmly knock the baseleg upwards locking it into position until flush.

Repeat steps 1 and 2 until you have three “L” shaped uprights.

Connect all “L” shaped uprights together by fitting 665mm back panels into the bottom “H slots” of both left and right hand side uprights to the central upright. Now check levels are correct by adjusting the foot discs as required.

Fit the plinth skirting into position by slotting it between the front capping on the baselegs.

Fit the base shelf onto the baseleg runners. Now fit all remaining back panels.

Note: Back panel lugs locating into the central upright must be bent to a 45 degree angle prior to installation.

Once the base shelf and back panels are in place the bay should look as above. You are now ready to fit the upper shelves.

Use two pairs of brackets per upper shelf insert as a single bracket in the left upright and a single bracket into the right upright. Then insert the other pair of brackets into the central upright.

Fit a matching shelf onto the brackets.

10

11

Repeat steps 8 - 9 until all the upper shelves are in position.

To finish use 665mm EPOS ticket strips and cut to suit the size of the shelf. Attach the EPOS ticket strips to the front of all shelves.
